Our range includes simple and stylish options in a range of colours and designs. Whether you need an extension kit or a conference call speakerphone for those days when you decide to work from home, take a look at our telephone accessories to find the solution. Just moved to a new house and got your landline up and running. A brandnew phone is the perfect finishing touch. Cordless phones give you the freedom to roam while you're on a call, so you can carry on with your household tasks while you pay that bill or book dentist appointment. A digital display with caller ID means you'll always know who's on the other end of the line. If your home has more than one floor, you might consider twin cordless phones for additional convenience. Why not go for one with a dedicated block button so you can crack down on those nuisance calls. Looking for something a little bit different.If you're on the move, then mobile phones will let you stay connected no matter where you are or what you're doing. Learn more here Buy online using We accept the following payment methods online Need Help. All Rights Reserved. Answering machine with up to 15 minutes digital recording time and helpful voice prompts. 200 Name and number phonebook to store all your contact numbers for easy dialling.

Store a directory entry then copy it or the entir e phonebook to another BT Verve 450 handset. Send

and receive text messages. 1 Quick access to a range of BT Services including directory enquiries and call divert. Caller Display lets you see who s calling and your phone s tores details of the last 20 callers in a Calls list. 2 Register up to 5 handsets to the base without the need for additional wiring. Digital call quality with a range of up to 300 metres outdoors and up to 50 metres indoors in ideal conditions. 1 You must subscribe to your network provider s Caller Display Service for text messaging to work and you must not withhold your telephone number. A quarterly fee may be payable. Some other network provider lines may not be compatible with this t ext messaging service. 2 You must subscribe to your network provider s Caller Display or Call Waiting service for these features to work. Please note that this equipment is not designed f or making emergency telephone calls when the power fails. Alternative arrangements should be made for access to emergency services. Before you make your first call you will need to set up your phone. Follow the simple instructions in Getting Started, on the next few pages. Our dedicat ed advisors are more likely to be able to help you than the retailer where you made your purchase. Alternatively, you may find the answer in the Help section at the back of this guide. Mobile and International call costs may vary.Make sure it is at least 1 metre away from other electrical appliances to avoid interference. Your BT Verve 450 works by sending radio signals between the handset and base. The strength of the signal depends on where you site the base. Putting it as high as possible ensur es the best signal. Setting up 1. Plug the mains power cable into the socket marked on the underside of the base and plug the other end int o the mains power wall socket and switch the power on.
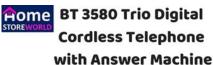

You can place the cable behind the retaining clip to prevent the plug being accidentally pulled from the socket. WARNING Do not place your BT Verve 450 in the bathroom or other humid areas. Handset range The BT Verve 450 has a range of 300 metres outdoors when there is a clear line of sight between the base and handset. Any obstruction between the base and handset will reduce the range significantly. With the base indoors and handset either indoors or outdoors, the range will normally be up to 50 metres. Thick stone walls can severely affect the range. Signal strength The icon on your handset indicates when you are in range. If moving out of range of the base, the range indicator will flash. If you go out of range, any call you are on will be lost. Which power adaptor. If you have purchased a multiple pack, you should use the power adaptor with the smallest plug for the base. IMPORTANT The base station must be plugged into the mains power socket at all times. Do not connect the telephone line until the handset is fully charged. Only use the power and telephone cables supplied with the product. You also hear a low battery warning beep once every 60 seconds. During charging, the icon will scroll in the display. Battery performance In ideal conditions, a fully charged battery should give up to 10 hours talk time or 100 hours standby time on a single charge. Note that new batteries do not reach full capacity until they have been in normal use for several

days. To keep the battery in the best condition, leave the handset off the base for a few hours at a time. Running the battery right down at least once a week will help it las t as long as possible. Eventually they will need to be replaced. After charging your handset for the first time, subsequent charging time is about 6 8 hours a day. Batteries and handset may become warm during charging. This is normal. The base indicator lights up. The answering machine is switched on. 2.

The NiMH battery is already fitted in the handset. Remove the battery compartment cover, by sliding it downward and lifting it off. Locate the battery lead and connector and plug it into the socket inside the battery compartment the red wire should be on the left. Tuck the battery leads in the space above the battery and slide the battery compartment cover back on. 3. Place the handset on the base t o charge for at least 20 hours. When the handset is fully charged the icon will be displayed. 4. When the battery is fully charged, plug one end of the telephone line cord into the socket marked on the rear of the base and the other end int o the telephone wall socket. Note Battery removal If you ever need to remove the batteries, simply slide open the battery compartment cover, lift the battery and unplug the connector. For each additional handset and charger 1. Insert the cable through the channel at the rear of the charger and insert the plug into the power socket. Plug the other end into the mains wall power socket and switch on. Using your BT Verve 450 on a Broadband line. If this product is to be used on a broadband line then you must ensure that it is connected via an ADSL microfilter. Using this product on a Broadband line without an ADSL microfilter may cause problems with this product and your Broadband service. Additional BT ADSL microfilters can be purchased from 2. The NiMH battery is already fitted in the handset. Remove the battery compartment cover, by sliding it downward and lifting off. Tuck the battery leads in the space above the battery and slide the battery compartment cover back on. Charge the battery for at least 20 hours. The date and time is recorded with each answering machine message you receive. If you do not have a Caller Display service you can set the date and time manually. Any additional handsets supplied as par t of a multipack are preregistered to the base so, once charged, are ready for use. The handset number is shown in the display.

For more information on BT Calling Features call BT free on To ensure the callers name is displayed, make sure you have stored the full telephone number, including the dialling code in the directory. When a new call is received in the Calls list the icon is displayed. If the number is unavailable, Unavailable is displayed. If the number has been withheld by the caller, Withheld is displayed. If the call is from the operator, Operator is displayed. If the call is from a payphone, Payphone is displayed. If the call is from a callback request, Callback is displayed. If you do not have a Caller Display service, an external call is displayed as External call. When there

are no calls in the calls lis t, the display shows Empty then will offer the Settings option. Caller Display If you have subscribed to a Caller Display Ser vice, you will be able to see your caller s number on your handset display provided it is not withheld prior t o answering the call. If your caller s name is stored in the directory and a number match is found, you will see the caller s name on the display instead. Calls list The Calls list holds up to 20 numbers. The date and time of the call is also stored if available.
